

The Multi-site Health Study PROCESS

Community Engagement:

Our staff will meet with community members to answer questions about the study.

Recruitment:

We urge eligible people to call for an appointment.

Data Collection:

Participants will provide blood and urine samples and answer medical questions.

Analysis:

Laboratories will analyze samples.

Individual Results:

We will mail each participant their test results.

Community Event:

We will host a community event to discuss results.

Study Results:

CDC/ATSDR will publish study results.
